

CLAIMS

We claim:

5 1. A system of providing a wireless day planner portfolio, comprising:
 a communication device;
 an interface coupled to the communication device; and
 a data entry system coupled to the interface; wherein
 the communication device, the interface, and the data entry system are
coupled together within a folio.

10 2. The system of claim 1 wherein the portfolio integrates the communication
 device, the interface, and the data entry system in communicative proximity to
 each other.

15 3. The system of claim 1 wherein the communication device is adapted to
 communicate wirelessly with a computing device.

20 4. The system of claim 1 wherein the communication device is adapted to
 communicate wirelessly with a communications network.

5. The system of claim 1 wherein the communication device is a receiver.

6. The system of claim 1 wherein the communication device is adapted to communicate wirelessly with a Cellular Digital Packet Data push technology communications network.

5

7. The system of claim 6 wherein the wireless connection is a wireless Local Area Network (LAN).

8. The system of claim 6 wherein the wireless connection is a Wide Area Network (WAN).

9. The system of claim 6 wherein the communication device is adapted to communicate wirelessly with a Global Positioning System (GPS).

10. The system of claim 1 further comprising a processor coupled to the interface.

11. The system of claim 1 further comprising an (LED) Light Emitting Diode coupled to the processor.

20

12. The system of claim 11 wherein the LED provides wireless communication status information.

13. The system of claim 1 wherein the interface is enabled to receive a thin-client.

5

14. A thin-client wireless portfolio, comprising:
a communication device;
a processor coupled to the communication device;
an interface coupled to the communication device; and
a data entry system coupled to the interface.

10

15. The thin-client wireless portfolio of claim 14 further comprising a thin-client coupled to the interface.

15

16. The thin-client wireless portfolio of claim 14 wherein the thin-client wireless portfolio supports an Infra Red Data Association (IRDA) IRComm Protocol.

17

15. The wireless portfolio of claim 14 wherein the thin-client wireless portfolio supports a Blue Tooth Protocol.

18

16. The wireless portfolio of claim 14 wherein the thin-client transceives audio.

20

19 17. The wireless portfolio of claim 14 wherein the thin-client transceives data.

20. A wireless day planner portfolio system, comprising:
 - a means for transmitting a radio signal;
 - a means for communication coupled to the means for transmitting; and
 - a means for data entry coupled to the means for communication.

21. A system of providing a wireless day planner portfolio, comprising:

- a communication device;
- a computing device enabled to communicate with the communication device, and capable of being located within a folio;
- an interface coupled to the communication device; and
- a data entry system coupled to the interface; wherein
- the communication device, the interface, the computing device, and the data entry system are coupled together within the folio.
